JOCKY Forensic Analysis & Threat Hunting Report

Case Identifier: JCK-2026-001
Generated Date: 2026-09-28 18:30:31
Lead Investigator: Dr. Sarah Chen, CISSP
Target System: WIN-FORENSIC-01
Target Platform: windows
Overall Risk Score: 88/100 (critical)

1. Executive Summary

Forensic acquisition & triage report for case JCK-2026-001 targeting WIN-FORENSIC-01. Analyzed 22 evidence artifacts, 10 fir

2. Evidence Summary & Chain of Custody

- [EVD-2026-001] Process Memory Artifact: suspicious.exe (Process) - SHA256: 9f86d081884c7d659a2f... [VERIFIED]
- [EVD-2026-002] Dropped Binary: C:\Windows\Temp\stager_drop.dll (File) - SHA256: a1b2c3d4e5f678901234... [VERIFIED]
- [EVD-2026-003] PCAP Capture: Socket Session 185.220.101.4:443 (Network) - SHA256: 7c8d9e0f1a2b3c4d5e6f... [VERIFIED]
- [EVD-2026-004] Windows Security Event Log EVTX Fragment (Log) - SHA256: 456789abcdef01234567... [REQUIRES_REVIEW]
- [EVD-2026-005] System Metadata Snapshot & Volatile State (System Metadata) - SHA256: 3456789abcdef0123456... [VERIFIED]
- [EVD-009] Unauthorized Cron Job /etc/cron.d/sync #9 (File) - SHA256: 8e757c258783707a7272... [VERIFIED]

3. Findings & Threat Indicators

- [CRITICAL] Potentially Suspicious Process Execution in Temporary Directory (Confidence: 94%) - Rule: Untrusted Temp Directory Binary
- [HIGH] Obfuscated PowerShell Invocation with Hidden Window Flag (Confidence: 89%) - Rule: Base64 Encoded Script Block Execution
- [HIGH] Anomalous Egress TLS Beacon to Anonymizing Exit Relay (Confidence: 87%) - Rule: Egress Beacon to Known Tor / Proxy Exit
- [MEDIUM] High Entropy Dynamic Library Dropped in System Location (Confidence: 78%) - Rule: Suspicious High Entropy DLL Creation
- [LOW] New Service Registration Event from Unregistered Provider (Confidence: 72%) - Rule: Event ID 7045 Service Installation
- [CRITICAL] Outbound TLS Beacon to Tor Exit Relay (Instance #13) (Confidence: 96%) - Rule: Untrusted Egress IP

4. Recommendations & Hardening Actions

- Isolate host network adapter and revoke active Kerberos TGT tokens.
- Quarantine untrusted binaries located in %TEMP% and cross-reference hashes.
- Preserve court-admissible disk image and export sealed evidence archive.
